Education

Tennessee State University –
Bachelor of Science in Computer Science (GPA: 3.77)

August 2022 - 2026

Georgia Tech –
Master's in Science in Computer Science

January 2027 - 2029

Languages and Tooles

Languages: Java, Python, JavaScript, MySQL | **Frameworks:** React, SpringBoot, FastAPI | **ML/AI :** XGBoost, Pandas, YOLO | **Tools :** Git, Github, VSCode, Microsoft Office, REST Api's, Kafka | **Cloud:** AWS EC2, AWS amplify, AWS RDS

Personal Projects

TrueBets — NBA Game Prediction Web Application | React, Python, XGBoost, FastAPI, MySQL

July 2025 – March 2026

- Designed and developed a full stack sports prediction platform that applies machine learning to predict NBA game outcomes. (win/lose)
- Created a responsive, animated React UI featuring real-time game cards, team matchup views, and dynamic probability bar visualizations that animate on prediction results
- Built and trained an XGBoost classification model on 12,000+ historical NBA games achieving 70% prediction accuracy, leveraging engineered features including offensive/defensive ratings, injury impact scores, bench strength, and pace metrics
- Designed and implemented a REST API using FastAPI to serve real-time ML predictions, connecting the React frontend to the Python backend with async data handling
- background sync job using the Schedule library to automatically update the database with new game results
- Deployed on AWS EC2 with the Reac
- Constructed an automated ETL pipeline using the NBA API and web scraping via Requests to collect, clean, and store player and team historical data into a normalized MySQL database
- Implemented a daily asynchronous t frontend hosted on AWS Amplify and MySQL on AWS RDS, up and available right now at truthnbets.com

TSU TIPS | Web app

January 2024 – May 2024

- Designed and developed a full stack web application enabling upperclassmen to submit and share campus guidance tips with new students.
- Built responsive interfaces using vanilla JavaScript, HTML, and CSS with custom CSS animations.
- Engineered a REST API integration layer to handle asynchronous data between the frontend and MySQL database.
- Developed and maintained consistent design system patterns aligned with TSU brand colors.
- Designed and managed a MySQL relational database schema to support dynamic content creation, retrieval, and structured data workflows.

Experience

The Meharry Medical college/Vanderbilt-Ingram Cancer Center/
Tennessee State University Cancer Partnership (MVTCP)

December 2024 – May 2025

Web Developer

- Managed and updated the stop. cancer. together website for the MVT Cancer Partnership, utilizing HTML, CSS, and JavaScript for customization.
- Modernized and revamped pages and content with screen responsiveness
- Collaborated with academic and healthcare experts to implement content updates and layout improvements.
- Maintained version control and iterative deployments through WordPress, managing live site updates across multiple content cycles
